# Introducing **THE OPTIMUM**

## The Ultimate In Expression

From the leader in products and service comes an exciting new product line developed to provide a dramatic design element for both exterior and interior masonry applications —

The Optimum Series.

Our new series provides the ultimate

## **SERIES**

*From Best Block Company*

in expression by offering designers and architects new face dimensions of 4" x 24", 8" x 24", 12" x 24", 16" x 16", 16" x 24" and 16" x 32".

And, you'll find The Optimum Series available in a painter's palette of integral colors suitable for any creative application or design.

Styles can be specified with a cast face, ground face, or textured split face surface for a bold visual character.

The look of the 90's and beyond is here today with the beauty and functional versatility of the all new Optimum Series.

For more information on The Optimum Series masonry units, please contact:

**WISCONSIN ARCHITECT** serves the design and construction industry in Wisconsin with circulation to Architects, Engineers, General Contractors, Business and Interior Designers, Landscape Architects, Certified Planners, Developers, Specifiers, Construction Managers, Facilities Managers, Builders, Manufacturers, and Suppliers. Wisconsin Architect is the official publication of the Wisconsin Society of Architects/A.I.A., published by Wisconsin Architect, Inc. Address all editorial and advertising inquiries to: Editor, Wisconsin Architect, 321 S. Hamilton St., Madison, WI 53703; phone 608/257-8477. Wisconsin Architect and the WSA disclaim liability for statements by the editors, contributors, and advertisers.

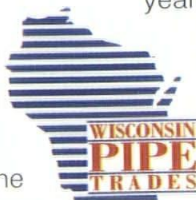

# Refrigeration Repairs Just Aren't As Simple As They Used To Be.

A block of ice was a simple solution to most refrigeration problems in years past. Today, it takes qualified professionals to keep even the simplest refrigerated units operating efficiently.

In this time of constant change and technological advances, contractors need a specialized staff with state-of-the-art training. That's why they rely on the

Wisconsin Pipe Trades. Our highly skilled craftsmen are all licensed professionals with years of experience and specialty training.

To ensure that your next building project has the best possible craftsmen, choose only contractors who employ Wisconsin Pipe Trades professionals.

Call today for more information

Welcome to the 1993 edition of the annual *WSA Construction Industry Handbook*, an invaluable reference source on matters pertaining to the Wisconsin Society of Architects. This year's edition, our thirteenth, contains directories of

### *Construction Industry Handbook*

WSA members and WSA member-owned firms, background on state legislative issues, information on AIA documents and a special "Buyer's Guide" section that lists advertisers by CSI Data Filing Format

divisions to help you identify consultants, products and services for your projects.

In addition to over 1,100 WSA members, the *Handbook* is distributed to over 2,200 other design and construction industry leaders across the state. It also is provided throughout the year to public and private owners interested in selecting an architect for their building projects.

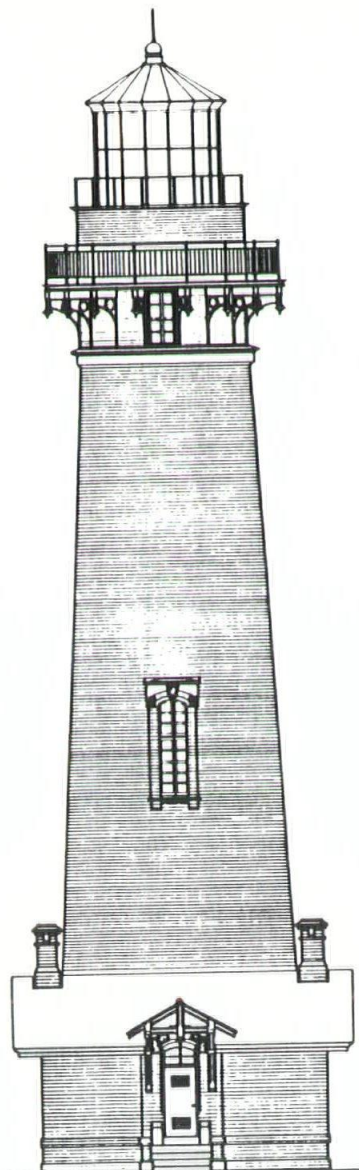

For 1993, upcoming issues of *Wisconsin Architect* magazine will feature commercial, residential, public, cultural, health, recreation, interior, landscape and restoration projects by WSA-member architects. Future issues also will feature a 1993 WSA Convention preview, a portfolio of the work submitted for the Young Practitioners Forum and the projects selected to receive WSA Design Awards.

Your comments and suggestions regarding the magazine are welcomed. On behalf of the Editorial Advisory Board, I encourage all WSA members to submit projects and/or articles on topics of interest for publication.

Peter J. Schuyler, AIA, Chairman

Editorial Advisory Board

## President's Message

**I**t is a pleasure to start the year 1993 and to be able to assure all members across the state that they can look forward to a continuation of the excellent programs which they have been a part of and have learned to count on for many years.

WSA is in good sound financial status. We have a significant increase in membership. Our annual Conventions and Fall Workshops have been meaningful and successful. Our magazine is in good condition, both in its content and its financial situation. In addition to this, we are privileged in having our Stoner House as a base for our operations. We also have an excellent staff, which operates our organization in a way unparalleled across the country. It is increasingly apparent to me how good an organization we have here in Wisconsin and how proud we should be in maintaining it at today's standards.

Nevertheless, we have a number of issues that we will be struggling with throughout the year. We will be involved in public awareness, community involvement, governmental affairs (including a new statute of repose), professional development, business development, environmental awareness, energy considerations and our membership in a changing profession. If these seem like familiar themes, they certainly are. They have been reoccurring for decades in the WSA. It is probably also safe to say that they will be continuing for some time in the future; for these are parts of a never ending cycle, the things that "drive" our organization.

Sometimes maintaining the status quo is all that we can and should expect. Other times there are situations which require aggressiveness, active advocacy for change and much vision.

This year will see the beginning of a new Board management style for WSA. It is our intent to eliminate some of the repetitive mechanics of operating the organization, thus allowing staff to do their work better and more efficiently and, hopefully, enabling Board members to develop a visionary approach and a proactive philosophy towards governing. This will allow the WSA Board of Directors more opportunity than ever before to be ready and able to address your issues.

It is important to remind you that the Board manages, but only at your direction. Your individual and collective input is essential. We will ask your response on specific issues, but certainly encourage all members to respond with anything you feel is relevant to you specifically or to the profession. Be sure to check the *Hotline Page Two* which has been instigated to act as a conduit between the membership and Board of Directors. We ask that you read this diligently and respond with your ideas and comments.

I welcome your continued participation; and I am looking forward to helping to continue a strong and meaningful organization through the coming year.

Ross T. Potter, AIA  
President  
Wisconsin Society of Architects

# Preferred Parking

For a parking structure driven by efficiency, economy and aesthetics, Spancrete is your perfect choice.

Spancrete structural precast parking deck components put construction schedules on the fast track. Each unit is produced and cured in our plant under carefully controlled conditions, and can be erected quickly on any site in any weather, with fewer delays.

Precast Spancrete cladding offers striking architectural treatment options, too. Like decorative reveals. False joints. Rich exposed aggregates in a variety of colors. Stone or masonry veneers. Even curvilinear shapes.

With Spancrete, you'll save on financing and maintenance costs. Realize a faster return on your investment. And produce a parking structure that's an asset to you and its environment.

Spancrete. The vehicle of choice for high-performance parking structures.

**(414) 481-1223**

**Fully compatible with your present  
AUTOCAD system. Think of its 3D  
rendering capabilities as a 3rd party  
add on package.**

Today, there is a revolutionary CAD system that puts you on the edge — the competitive edge. A CAD system that goes far beyond the ordinary, and gives you the edge in production, presentations, plus a lot more.

The name of this system is ARRIS.™ And it is the remarkable system that will instantly show you why ordinary CAD is no longer enough for architecture and building design and management.

**THE COMPETITIVE EDGE IN PRODUCTION.**

With ARRIS, you don't have to make drawings line by line. Instead, you enter basic design parameters — and the system does the rest of the work, automatically. So more work gets done, in less time.

**PLUS.**

ARRIS allows your project teams to share data, drawings and systems — so they can work on entire projects, not just single drawings. Plus, ARRIS will grow as you grow, so you keep your competitive edge.

**THE COMPETITIVE EDGE IN PRESENTATIONS.**

With ARRIS, you can create extraordinary design and marketing presentations that help you win more business. For example, ARRIS 3D modeling and rendering allows you and your clients to view your project from any perspective, at any angle, at any time of night or day. And to "walk through" rooms as if they really existed.

**sun**

Production—Design automation, design refinement  
and 3-D capability increases your productivity

# WSA Commissions & Committees

**T**he WSA Board of Directors has established numerous committees of volunteer members to assist in the development of a broad range of programs and services for the benefit of the entire membership and profession. The wide array of WSA committees reflects the varied interests and concerns of the membership.

Your involvement and participation on these WSA committees is strongly encouraged. You will benefit from the opportunity to network with other architects from across the state with similar interests. The WSA and your fellow members will benefit from the knowledge, skills and expertise you can provide these committees as they shape WSA programs and services.

There also are ample opportunities to get involved with local Chapter committees, task forces and special events. Your participation at the Chapter level can make a big difference. For more information, please contact local Chapter officers in your area.

At the state level, each WSA committee is assigned to one of four commissions: Executive, Education & Practice, Government Affairs and Component Affairs. Each of these commissions has a "director advisor" who is a member of the WSA Board of Directors and reports on committee activities at regularly scheduled WSA Board meetings.

The following is an outline of the four WSA commissions and their related committees. It contains the mission

statement for each WSA committee along with the name and phone number of the committee chairperson. If the work of a particular committee sounds interesting to you, please contact the chairperson for further details on how you can get involved. If you can't find the committee you're looking for, contact one of the director advisors about establishing a new WSA committee.

## **Executive Commission**

*Director Advisor:* Roger Roslansky, AIA, (608) 784-1830

**Executive Committee:** To exercise general supervision over the affairs of the WSA; to assure that all administrative, financial and other matters assigned to WSA officers by the Bylaws and/or delegated to the Executive Committee by the Board of Directors are carried out in an efficient and effective manner; to safeguard and maintain WSA office and other property; to regularly evaluate the job performance of the executive director and other WSA staff; and to serve as the Board of Directors of *Wisconsin Architect* magazine. *Chairperson:* Ross T. Potter, AIA, (608) 257-3825

**Editorial Advisory Board:** To provide regular advice and counsel to WSA and magazine staff and to develop recommendations for the WSA Board of Directors to assist *Wisconsin Architect* magazine in achieving its established purposes of featuring the

work of WSA-member architects in a creative format, providing practical informative articles of educational interest, keeping WSA members informed of current activities and programs, and presenting a forum for material suppliers to advertise their products and services. *Chairperson:* Peter Schuyler, AIA, (414) 351-6390

**QBS Committee:** To create, maintain and improve a resource readily available to public owners and members for the objective, informed, responsive and professionally responsible promotion of Qualification Based Selection (QBS) procedures; to monitor QBS program and advise the Board of Directors as to its operations; to establish objectives, recommend policies, approve presentation materials, promote owner and member participation, coordinate with related professional organizations and evaluate program performance. *Chairperson:* Harry Schroeder, AIA, (608) 782-3993

**Public Awareness Committee:** To encourage architects to work together to develop and maintain a clear understanding of the present and future roles architects play in society so to effectively position the profession to be of greatest service; to develop materials and programs to expand the public's awareness of architecture and architects as well as architects' awareness of the public's needs and expectations. *Chairperson:* Kevin Connolly, AIA, (414) 276-6600

**Convention Committee:** To work with WSA Board of Directors, staff and other committees to plan, promote, coordinate and conduct an annual

statewide conference on design, practice and technology issues that is attractive to members, allied professionals and material suppliers and that achieves or exceeds financial goals established by WSA budget. *Chairperson:* Russ LaFrombois, AIA, (414) 276-6600

**Design Awards Committee:** To convene an annual design awards jury for selection of the work of WSA-member architects that merits recognition for design excellence; to assist the WSA in disseminating the results of this selection to members and public through *Wisconsin Architect* magazine, the annual WSA Convention and media thereby fostering public awareness of the work of member architects; to sponsor Honor Awards speaker and banquet at WSA Convention; and to encourage dialogue by the public and among WSA members of the purpose and direction of architectural design in Wisconsin. *Chairperson:* Bob Cooper, AIA, (414) 271-5350

### **Education & Practice Commission**

*Director Advisor:* Jim Larson, AIA, (414) 233-8442

**Environmental Education Committee:** To develop sample lesson plans and other materials that can be used by teachers and members as a guide for increasing the public's awareness and understanding of architecture. *Chairperson:* Lisa Kennedy, AIA, (414) 332-9072

**Wisconsin Architects Foundation:** To promote the science and art of planning by advancing the standards of architectural education, training and practice; to provide scholarships to Wisconsin students pursuing degrees in architecture; to provide program grants to student chapters at universities and technical colleges in Wisconsin; and to support programs and activities that increase the public's awareness and appreciation of architecture and architects. *Chairperson:* Gary Zimmerman, AIA, (414) 476-9500

**Intern Development Program:** To continue to educate interns and practitioners about the Intern Development Program (IDP) and its requirements to become a registered architect in Wisconsin as of January 1, 1993. *Chairpersons:* Richard Wandschneider, AIA, (608) 238-0211 & Arlan Kay, AIA, (608) 251-7515

**Fall Workshop Committee:** To work with WSA Board of Directors and staff to plan, promote and conduct an annual one-day workshop on practice issues of interest to members. *Chairperson:*

**Historic Resources Committee:** To encourage the preservation of Wisconsin historic resources; to promote within the architecture profession and the general public a greater awareness, appreciation and respect for those historic resources; to provide leadership, programs and technical support within the profession on preservation-related issues, serving as a source of information and education. *Chairperson:* Charlie Quagliana, AIA, (608) 266-1458

**Dean's Advisory Group:** To establish a more formal link and format for increased dialogue between the UWM School of Architecture & Urban Planning and the profession by providing for discussion with the Dean on School-related issues and programs in conjunction with regularly scheduled meetings on the WSA Board of Directors. *Chairperson:* Bob Greenstreet, Dean, (414) 229-4016

**Minority Resources Committee:** To establish liaison with national AIA committee and to provide networking opportunities for minority architects and interns in Wisconsin. *Chairperson:* Walter Wilson, AIA, (414) 771-6222

**Women in Architecture:** To establish liaison with national AIA and regional WIA committees and to develop programs of interest to women architects and allied professionals. *Chairperson:* Pat Frost, AIA, (414) 332-3369

**AIA Documents Committee:** To assist the national AIA Documents Committee by encouraging and compiling recommendations from WSA members on possible revisions to AIA documents. *Chairperson:* Brian Larson, AIA, (715) 834-3161

#### **Government Affairs Commission:**

*Director Advisor:* Joe Powelka, AIA, (608) 241-3340

**Legislative Committee:** To identify public policy issues of importance to Wisconsin's design and construction industry; to develop positions and make recommendations on legislative

issues of interest and concern to the architectural profession; to lobby appropriate legislative committees and administrative agencies; to encourage the active grassroots participation of members in the legislative process; and to communicate with other professions that have similar legislative concerns. *Chairperson:* Fred Zimmermann, AIA, (608) 238-7626

**DFD Liaison Committee:** To establish a continuing dialogue with the state Division of Facilities Development and to establish a format for discussion and resolution of problems and issues of mutual concern. *Chairperson:* Jerry Dommer, AIA, (608) 241-3340

**DILHR Liaison Committee:** To establish a format for ongoing discussion and resolution of Building Code, plan review and related issues of concern to profession and the Safety & Buildings Division of DILHR. *Chairperson:* Warren Bauer, AIA, (608) 274-2741

#### **Component Affairs Commission**

*Director Advisor:* Horst Lobe, AIA, (608) 263-3012

**Membership Committee:** To develop and implement programs and materials for expanding membership and for increasing membership retention and participation; to profile and analyze membership attitudes and needs for use in planning member recruitment programs, developing methods to encourage increased member participation and recommending new programs and services to respond to member needs. *Chairperson:* Mike Vander Werff, AIA, (414) 730-0055

**Architecture Awareness Week:** To promote programs that increase architectural awareness for the purpose of greater appreciation, understanding and enjoyment by society; to assist in coordinating the planning and development of annual Architecture Awareness Week activities in each of the WSA Chapters. *Chairperson:* John Sutton, AIA, (608) 255-1245

**WSA/AGC Liaison Committee:** To improve working relations between WSA and AGC and to enhance understanding of contract documents; to develop recommended practices for use by architects and contractors. *Chairperson:* Clarence Huettnerauch, AIA, (414) 351-6390

**Fellowship Committee:** To identify and recommend to the WSA Board of Directors candidates for nomination for advancement to the AIA College of Fellows; to encourage members to seek advancement and assist candidates in the preparation of nomination materials. *Chairpersons:* Ron Bowen, FAIA, (608) 238-7626 & Wayne Spangler, FAIA, (715) 234-9056

**Golden Award Committee:** To screen and rank WSA Golden Award nominations for submission of recommendation to WSA Board of Directors. *Chairperson:* Frank Dropsho, AIA, (608) 221-6263

## Small Change Could Cost You Big Dollars

—By Roger K. Lewis, FAIA

Copying blank AIA Documents is illegal... and dangerous. The AIA Documents are revised periodically to reflect current case law and the ever-changing practices within the construction industry. Copying an outdated AIA Document—that's missing even a small change or revision—increases your liability and the possibility that you'll pay big dollars to settle a dispute. Don't take chances; order your current AIA Documents from us today.

## PELLA PROVES TO HAVE THE WRIGHT TOUCH

The ability to adapt to different periods in time is a wondrous thing. Through time, Pella® has become a master in customizing windows and doors to fit a building's architectural history. The Seth Peterson restoration project exemplifies Ver Halen's ability to adapt windows and doors to architectural periods in time.

The challenge: To utilize today's window technology to restore the cottage's windows and doors according to the original design.

In keeping with the 1958 design, we duplicated the look of the original

windows using Douglas Fir. Using double-glazed windows, we upgraded the energy efficiency of each window.

We are proud of our involvement in this monumental restoration project and were pleased to provide more than 30 windows and doors. We saw it as a wonderful opportunity to preserve the work of America's greatest architect, and allow future generations the opportunity to enjoy the architectural brilliance of Frank Lloyd Wright.

## What You Don't Know Can Hurt You!

Before beginning your next digging project, stop and think about the thousands of miles of buried and overhead power lines, gas pipelines and other facilities throughout Wisconsin, possibly directly at your work site.

State law requires you to notify owners and operators of transmission facilities at least three working days before you dig. Call Diggers Hotline, because what you don't know CAN hurt you.

# WSA Membership Directory

The Wisconsin Society of Architects (WSA) is the statewide component of The American Institute of Architects. The WSA has over 1,100 members and represents Wisconsin architects and allied professionals in private practice, corporations, industry, government and education.

The WSA is composed of four local Wisconsin Chapters: Southeast, Southwest, Northeast and Northwest. Each WSA member also is a member of one of these local WSA Chapters.

The objectives of the WSA and its members are:

- To advance the science and art of planning and building by advancing the standards of architectural education, training and practice.
- To coordinate the building industry and the profession of architecture.
- To promote the aesthetic, scientific and practical efficiency of the profession.
- To insure the advancement of the living standards of people through their improved environment.
- To make the profession of architecture of ever-increasing service to society.
- To cooperate with and promote the objectives of The American Institute of Architects (AIA) within the state of Wisconsin.

The accompanying 1993 WSA *Membership Directory* is divided into four sections corresponding to WSA membership categories:

**AIA Members:** Registered architects who are Architect members of The American Institute of Architects (AIA). Within the membership category, Emeritus members are designated by AIA-E and Fellows of The American Institute of Architects by FAIA.

**Intern/Associate Members:** This section includes Intern AIA and Associate AIA members. Intern members are those who are eligible by education and experience and actively working towards licensure as an architect. Associate members include individuals without architectural registration from a U.S. licensing authority but who are either employed under the supervision of an architect (Practicing), have a professional degree in architecture (Degreed), are university faculty involved in architectural research or teaching (Academic), or have an architectural license from outside the U.S. (International).

**Professional Affiliate Members:** Individuals who are not architects but may be registered to practice their professions where such requirements exist (e.g. engineers, landscape architects, interior designers, artists and other professionals whose work is related to architecture).

**Student Affiliate Members:** Undergraduate and graduate students attending architectural schools and vocational-technical colleges in Wisconsin.

The *WSA Membership Directory* includes the following information for each member: name, firm name, mailing address, daytime telephone number and local WSA Chapter. The *Directory* is updated annually as part of a survey of WSA members conducted each fall.

If you have any questions, comments or suggestions regarding the *WSA Membership Directory*, please contact the WSA office: Wisconsin Society of Architects, 321 S. Hamilton Street, Madison, WI 53703; (608) 257-8477/1-800-ARCHITECT.

The illustration depicts three sheet metal workers in various stages of their craft. One worker is shown in a full protective suit, possibly welding or working with hazardous materials. Another worker is using a tool to shape a large, curved metal piece. A third worker is shown in the foreground, working on a flat metal sheet. A large, detailed metal pipe with a flange is also shown. In the center, there is a circular seal for the 'WISCONSIN STATE LOCAL 18 SHEET METAL WORKERS' union, featuring a map of Wisconsin and crossed tools.

# Easy on the Eye... Easy on the Architect.

Our beautiful sunrooms come  
with something extra...  
Complete technical assistance.

When you specify our products, we'll give  
you full specifications, detailed drawings,  
design assistance and a wealth of experience.  
And it's all as close as your phone, your fax  
or your overnight mail pickup.

We make a great sunroom a great deal  
easier to specify. Call us now. We're easy.

**Let's Talk Technical.**

## Tilt-Up Concrete Buildings

### Giving you more than beautiful savings

Tilt-Up Concrete offers all the advantages you've come to expect from concrete walls — durability, low maintenance, energy savings, fire resistance, low insurance premiums and lasting value.

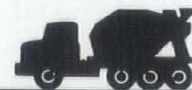

As a bonus, Tilt-Up Concrete buildings feature rapid forming, casting and panel erection for

exceptionally, economical construction.

Discover the many benefits of Tilt-Up Concrete buildings. Call Wisconsin Ready Mixed Concrete Association at 1-800-242-6298 for details.

# The Overwhelming Choice in Floor Underlayments.

We've poured our underlayments in apartments, condominiums, office complexes, single-family homes and shopping malls. More than 1 billion square feet of Gyp-Crete®, Gyp-Crete 2000™ and Dura-Cap™ have been installed nationwide. For new construction or renovation, they're the overwhelming choice in poured floor underlayments. Installed at a fraction of the cost of other cementitious underlayments.

Here's why:

- Sound and fire control
- Accepts virtually all finished floor goods
- Pour over wood or concrete subfloors
- No shrinkage cracks
- Poured from featheredge to 3"
- Accepts foot traffic within 90 minutes
- Fast, efficient installation
- Leveling capabilities

# You and Your Architect:

## An Introduction

**B**uilding in today's marketplace is a complex undertaking requiring many different skills and products. No two building projects are exactly alike, so there is no single clear-cut path to follow to achieve the appropriate solution to your unique requirements and needs.

Whether you are building your own home or planning a commercial complex, selecting the right architect is important to a successful project. The architect is the one professional who has the education, training, experience and vision to guide you through the entire design and construction process, from helping you define what you want to build to helping you get the most for your construction dollar. Working with other design and construction professionals, architects can help you end up with a well-designed project that meets your needs and works with your budget and time frame.

### Wise Investment

Architects are trained to solve problems in creative ways, translating your needs into square feet and three-dimensional space. With their broad knowledge of design and construction, architects can show you alternatives and options you might never think of on your own.

The architect's services are a wise investment, not an added cost to your project, because:

- A well-conceived project can be built more efficiently and economically. Architects plan your project with you. As your ideas evolve, changes can be made on paper much less expensively than later on when construction is underway. Thorough drawings also make it easier for the contractor to accurately price and build your project.
- Energy efficient buildings can save you money on fuel bills down the road. An architect can design a

building to maximize heating from the sun and let in natural light, thus reducing your heating, cooling and electric bills over time.

- The architect can work with your budget and help you select the appropriate materials and workmanship at a fair price. Architects develop the drawings and specifications to help you get bids for construction that are based on your requirements.
- An architect can help you choose materials and finishes that are durable as well as beautiful, saving on frequent maintenance and replacement costs. Architects work to stay abreast of advances in roofing, brick work, floor tiling, paint finishes, etc. Their familiarity with the full range of materials enables them to suggest the appropriate materials for your project.
- Good design sells. A well-designed house has a higher resale value. A well-designed store draws customers. A well-designed work environment attracts employees and increases productivity.
- The architect can make your life easier. Let's face it, building is a long process that is often messy and disruptive, particularly if you are living or working in the space under construction. The architect you hire looks out for your interests and tries to find ways to make that process go smoothly.
- If your project requires engineering or other design services, the architect can coordinate this team of experts so you don't have to. The architect sorts out complex building codes and zoning laws. The architect can help you find qualified construction contractors based on your requirements. The architect visits the construction site to help verify that the project is being built according to plans and specifications.

### Selection

Architecture firms come in a variety of sizes and types. Each firm brings a different combination of skills,

expertise, interests and values to its projects. Statistically, the average firm is made up of nine or ten people. Many firms are smaller, with as few as one or two architects. Some are very large with staffs of 50 or more. Some firms specialize in one or more project or facility types; others do not. Some firms include in-house engineering services (e.g. civil, structural, mechanical or electrical) or other design disciplines (e.g. planning, urban design, landscape architecture or interior design). Many other architects introduce these disciplines into their projects through appropriate consultants.

First-time clients, and even experienced clients facing new situations, have many questions about architect selection. The following are some of the more common:

- *When, in the life cycle of a project, should I bring the architect into the picture?* As early as possible. Architects can help you define the project in terms that provide meaningful guidance for design. They can also do site studies, help secure planning and zoning approvals and perform a variety of other predesign tasks.
- *Should I look at more than one firm?* Usually, yes. The exception, of course, arises when you already have a good relationship with an architect and it makes little sense to change.
- *How do I find potentially suitable firms to contact?* Start building a list of potential architects. Contact other owners who have developed similar facilities, and ask whom they interviewed and ultimately selected. Ask who designed buildings and projects that you've admired or that seem especially appropriate. Get recommendations from friends and relatives who have worked with architects. The Wisconsin Society of Architects (WSA) publishes annual directories of WSA-member archi-

tecs and WSA member-owned firms (the lists are located elsewhere in this publication). The WSA also has directories of members interested in residential projects and historic preservation, restoration and adaptive use. These reference lists are available by contacting the WSA office in Madison at (608) 257-8477 or 1-800-ARCHITECT. In addition, the WSA office can assist public owners establish a complete Qualifications Based Selection (QBS) process for their projects.

- *What information should I request?* Contact each firm on your list. Describe your project and ask if they are available to take on your project. If they are, request literature outlining the firm's qualifications and experience. If the office is unable to handle your project, ask if they can suggest another firm. The materials you receive from interested firms might include a letter of interest, brochures, fact sheets, photos of past work and biographical material about key personnel. Look beyond the style of the brochure to determine which firms have the right experience and capabilities for your project. At this point, you should be able to narrow your list to the architects you will interview.
- *Why are formal interviews desirable?* An interview addresses one issue that can't be covered in brochures and printed materials: the "chemistry" between the owner and the project team. It also allows the owner to investigate how each architect will approach the project. Remember, you will be working with the architect for a long time and will want someone with whom you feel comfortable.
- *How many firms should I interview, and how should they be selected?* Most people advise that you interview between three and five firms, enough to see the range of possibili-

ties but not so many that an already tough decision will be further complicated. Select for interview architecture firms you feel can do your project because of their expertise, their experience or their ability to bring a fresh look to your situation. Treat each firm fairly, offering, for example, equal time and equal access to your site and existing facilities. Insist on meeting the key people who will work on your project.

- *What can I realistically expect to learn from an interview? How can I structure the interview to make it as informative as possible?* During the interview, ask a lot of questions. You can learn how the team the architect has put together will approach your project. Ask how the architect will gather information, establish priorities and make decisions. Ask what the architect sees as the important issues or considerations in the project. Evaluate the firm's interest in your project: will your needs be a major or minor concern? Evaluate the firm's style, personality and approach: are they compatible with yours? If, during the interview, there is something you do not understand, ask the architect for clarification.
- *How should I follow up?* Tell each firm what you intend to do next and when you plan to make your decision. If you haven't talked with past clients, do so now. Assess both the performance of the firm and the performance of the resulting architecture. You may want to visit existing buildings to see them in use. Notify the selected firm as soon as possible. Remember, conditions change; the firm may not be able to offer the same project team if you must take several weeks or months to decide.
- *On what should I base my decision?* Personal confidence in the architect is preeminent. Then seek an appropriate balance among these factors: technical competence, professional service, cost and, of course, design ability. Once you've selected the best

firm, enter into detailed negotiations of services and compensation. If you cannot agree, begin negotiating with your second choice.

- *Some say that I should select a builder or contractor before selecting an architect. When is that good advice?* It works best to select an architect first, then you will have help in understanding how to make the builder or contractor an effective member of the building team.

However architect selection is approached, it is worth taking the time to do it well. Some additional guidance:

- You are engaging the services of a professional. You will work closely with the architect through the life of the project; and your relationship may extend to future projects. Invest at least the care it takes to select a financial or legal adviser.
- Yours will also be a business relationship. Find out how prospective architects do business, how they work with their clients, how responsive they are to your management and decision styles, and how well their work stacks up against their clients' expectations. The best way to find out is to talk with other owners for whom the firm has provided professional services.
- Ask questions. Respect the architect as a professional who will bring experience and specialized knowledge to your project. At the same time, don't be afraid to ask the same questions you've asked yourself: What does the architect expect from the project? How much information does the architect need? How does the architect set priorities and make decisions? Who in the firm will work directly with the client? How will engineering or other design services be provided? How does the firm provide quality control during design? What is the firm's construction-cost experience?

- Be frank. Tell the architect what you know and what you expect. Ask for an explanation of anything you don't understand. The more on the table at the beginning, the better the chances for a successful project.
- Get it in writing. Once you have found the architect, you are ready to put in writing the terms of your agreement on the scope of work, services, schedule, construction budget and architect's compensation. This written agreement can take many forms. The American Institute of Architects has developed a variety of standard contract forms which are used industry-wide. The WSA office in Madison maintains a complete inventory of these AIA standard contract documents.

### Successful Projects

The best building projects are created when the client and architect work together as a team. Both you and your architect can take specific steps to help meet your quality, time and budget goals.

Design and building are group activities. Many people and firms come together to do a project; they may not have worked together before and they may not work together again. They collaborate to produce a complex and usually unique result on a specific site. As the project unfolds, hundreds of individual design decisions and commitments are made. Needs and conditions change, and work is modified. A strong and healthy relationship between owner and architect is essential to keep the project on track.

Design and construction projects typically involve several steps or phases. These may include: programming, schematic design, construction documents, bidding or negotiation with contractors and construction. However, on some projects several of these steps may be combined; on others there may be additional phases involved.

The architect's involvement normally does not stop with the preparation of construction documents. Architects also provide construction administration services. These services may include assisting you in hiring the contractor, making site visits, reviewing and approving the contractor's applications for payment and keeping you informed of the project's progress.

The path to a successful building project is paved with lots of challenges and uncertainty. There are literally hundreds of decisions to be made, decisions which have a strong impact on how the project looks and functions over time.

Experience tell us that successful projects—those that respond to owner needs and aspirations, that are accomplished within schedule and budget and that contribute to the quality of our communities and our lives—result from good clients and good architects who form good professional, business and often personal relationships. These relationships are formed early on and are nourished by clear communications, mutually understood expectations and a willingness of both you and your architect to accept your responsibilities for realizing a successful project. **WA**

**Hiring a sheet metal contractor?**

***Using the best trained,  
most highly skilled labor  
is your best guarantee for  
maintaining cost control.***

Maintaining the highest standards of quality and efficiency for your building project is no simple task. The trick is to be able to control expenses while avoiding sub-standard work that will wind up costing you extra in the long run.

When you choose a sheet metal contractor, you need to look for the bid that will give you the best value for your construction dollar. And that's where the training and experience of skilled union craftsmen can make the difference.

We offer experience, professionalism and reliability — your best guarantee for meeting deadlines and budgets.

# WSA Firm Directory

Design and building are inherently exciting; and there is nothing more satisfying than a successful project. The secret to success lies in the professional, business and personal relationship between building owner and architect. Whether you are building or remodeling your home or planning a commercial, industrial or public facility, selecting the right architect is important to achieving a successful project.

Members of the Wisconsin Society of Architects (WSA) have been selected for major projects across the country and have received many important awards. WSA-member architects have assisted thousands of clients with creative solutions to their buildings needs.

Investing in the professional services of an architect is a wise use of often very limited building resources. A well-conceived project can be built more efficiently and economically. An architect can design a building to maximize natural light, thus reducing heating, cooling and electric costs. The architect can help you select materials and finishes that are durable as well as beautiful, saving on maintenance and replacement costs. Good design pays dividends...a well-designed store draws customers and a well-designed work environment attracts good employees and increases productivity.

If you need the professional services of a qualified architect, you will find a suitable firm in this *1993 WSA Firm Directory*. The firms listed will welcome the opportunity to discuss your project with you.

The *WSA Firm Directory* includes the following information on each firm: firm name, address, county and telephone and fax numbers; names of the principals or partners of the firm; number of registered architects and total employees; and a description of the firm's practice.

The information contained in the *Directory* was provided by the firms as part of an annual survey of WSA members. It is a roster of firms owned by WSA-member architects. To be listed, at least one of the firm's principals or partners must be a registered architect and an AIA member of the Wisconsin Society of Architects.

You are encouraged to keep the *1993 WSA Firm Directory* handy for reference throughout the year. Contact the firms listed for further information about their practice and the professional services they can provide for your project. If you have any questions or suggestions regarding the *Directory*, please contact the WSA office: 321 S. Hamilton Street, Madison, WI 53703; (608) 257-8477/ 1-800-ARCHITECT.

# A

## HELMUT AJANGO ARCHITECT

108 N. Main Street  
Fort Atkinson, WI 53538-1827  
(414) 563-4320  
FAX (414) 563-5545  
County: Jefferson

Helmut Ajango, AIA

Registered Architects: 2  
Total Employees: 6

### *Description of Practice:*

Building types break down as 25% residential (apartments, homes), 15% restaurants, 30% churches, 20% restoration and interior design and 10% offices. The firm has practiced in Wisconsin for 25 years and has received honors for its designs. The principal architect has a degree in art, architecture and architectural engineering and the firm strives to carefully and imaginatively combine all three. Of all the different building types, the firm enjoys the churches the most, feeling it is this building type that generally strives for more imagination than some others and wishes it to be built for the least cost, giving the architect the greatest challenge.

## JOSEPH W. ALBERT III, AIA

2718 S. Shore Dr.  
Milwaukee, WI 53207  
(414) 744-8899  
FAX (414) 744-8899  
County: Milwaukee

Joseph W. Albert III, AIA

Registered Architects: 1  
Total Employees: 2

### *Description of Practice:*

Our firm is a full service architectural/planning firm with creative expertise in projects ranging in size from single family residences to large scale urban design. Experience includes schools, medical facilities, recreation buildings, interior space planning and remodeling, multi-family housing and commercial office space. We also design company graphics and work with clients on creative thinking (general problem solving).

## THE ALBION GROUP

730 North Plankinton Ave.  
Milwaukee, WI 53203  
(414) 272-2060  
FAX (414) 272-2063  
County: Milwaukee

David W. Krummel, AIA  
Steven R. Gartman

Registered Architects: 2  
Total Employees: 6

### *Description of Practice:*

The Albion Group is a professional corporation providing complete architectural services including programming, space planning, interior design, cost estimating and feasibility studies. Skill and dedication to quality and economical design solutions are common practice with all Albion Group projects. In addition to conventional production methods, we fully utilize a state-of-the-art CADD system from design through construction on the majority of our projects to ensure the best quality and efficiency. The firm has experience with all major building types including commercial, retail, municipal, educational, ecclesiastical, office, residential, industrial and financial. The Albion staff takes great pride in the work we produce and the relationships we develop with our clients.

## ANGUS-YOUNG ASSOCIATES, INC.

51 S. Jackson St.  
Janesville, WI 53545  
(608) 756-2326  
FAX (608) 756-0464  
County: Rock

Jeffrey Hazekamp, AIA  
Joseph Stadelman, AIA  
Gordon Buitendorp, AIA  
James Angus, AIA  
Noble Rose, AIA  
James Vanderveen

Registered Architects: 5  
Total Employees: 12

### *Description of Practice:*

Angus-Young Associates has been offering full architectural/engineering services for nearly 4 decades. Past projects include Van Hise Hall UW-Madison, Janesville Municipal Building and Center for the Arts UW-Whitewater. Our specialties include medical facilities, municipal, commercial, residential and industrial projects resulting in such commissions as Riverview Clinic Addition, Janesville, the City of Janesville City Service Center, Fairhaven Home for the Aged and the GM Suburban/Blazer Addition. By using the most recent CADD technologies, Angus-Young Associates is 100% computerized and able to offer large firm services and efficiencies with small firm care and personal attention to all our clients.

## ARCHDESIGN LTD.

2075 W. Mill Rd.  
Milwaukee, WI 53209  
(414) 351-1451  
FAX (414) 351-4521  
County: Milwaukee

Frank Richardson, AIA

Registered Architects: 1  
Total Employees: 4

### *Description of Practice:*

Small firm stressing one-on-one relationships with clients, tailoring services and design specifically to their needs. Principals have over 20 years' experience in architecture, interior design and construction management of office buildings, multi-tenant "Flex Centers," industrial/warehouse facilities, commercial/retail centers, residential (single and multi-family) and renovation/rehab projects, including ongoing relationships with developers and contractors throughout the Midwest and East Coast. Specialize in working with design/build contractors.

## THE ARCHITECTS

3306 University Ave. Suite 17  
Madison, WI 53705  
(608) 233-6363  
FAX (608) 233-7063  
County: Dane

Steven R. Rice, AIA

Registered Architects: 2  
Total Employees: 4

### *Description of Practice:*

The Architects is exclusively comprised of professionals who possess unique and diverse professional experience as well as the enthusiasm and capability to provide comprehensive architectural services which translate into positive results for our clients. The Architects has accomplished a wide range of projects and is gaining a reputation for cost-effective design, innovation, responsive project scheduling, computer aided design and production of construction documents and thorough construction administration. Recent projects include numerous school additions and remodelings, several office suites, retail stores, restaurants, convenience stores and a number of residential projects.

## KEE ARCHITECTURE, INC.

7017 Old Sauk Road  
Madison, WI 53717  
(608) 833-9202  
County: Dane

Douglas Kozel, AIA  
David Ewanowski, AIA  
Jan Eymann

Registered Architects: 2  
Total Employees: 3

### *Description of Practice:*

We pursue an architecture of ideas, soundly executed and thoroughly serviced. For us, richness in architecture lies more in the strength of the idea than in the expense of the materials. Our method is centered on the needs of the client, on developing appropriate architectural responses and on building within clients' means and schedules. KEE Architecture is organized traditionally: projects are closely managed by principals, allowing full interaction with clients. Our qualifications include 39 combined years of experience in architecture, interior design and landscape architecture. We are especially capable in corporate and commercial offices, government and community facilities and complex renovation work.

(608) 785-2217  
FAX (608) 785-2214  
County: La Crosse

Valentine J. Schute, Jr., AIA  
Tim P. Larson, AIA

Registered Architects: 4  
Total Employees: 9

### *Description of Practice:*

Continuous involvement is the philosophy of our firm. The partners take an active role in each project, from planning and design to construction. Our clients are part of the design team. Instead of guessing what they want, we ask them what they want and what their needs are. Then we solve their problem, not ours. This philosophy has proved successful for projects that range from schools, libraries and churches to corporate headquarters and financial institutions to private homes to extensive restoration/renovation work.

# Specify Flexicore Floors & Ceilings in your next Multi-level Building it's sound proof and fire resistive...

Delivery and erection by  
experienced Mid-States field crews.  
(These services are included in  
the quotations.)

- Flexicore/Flexicast structural systems offer more clear span for basement parking and/or storage.
- The structural system is more cost effective than other types of construction.
- Flexicore/Flexicast systems meet all state/local building codes.
- Faster construction in all types of weather.

## **PAC-CLAD®**

**prefinished galvanized  
steel and aluminum**

Project: St. Paul's Lower School Building  
Brooklandville, MD  
Architect: Greives & Associates  
General Contractor: Henry H. Lewis Contractors Inc.  
Roofing Contractor: Fick Brothers  
Color: Arcadia Green  
Profile: Integral Standing Seam

- Full Kynar 500®
- 24 ga. steel
- .032 through .080 aluminum
- 23 standard colors
- 20 year non-prorated warranty
- Metal roofing, gravel stops and copings
- UL 90 rated panels
- New PAC-CLAD metallic finishes

For complete information regarding the Petersen Product Line, and to be placed on our mailing list, please give us a call at 1-800-PAC-CLAD.

# 1993 Legislative Issues

*The following provides a summary of the major state legislative issues of interest to members of the Wisconsin Society of Architects during the 1993-94 session of the Wisconsin Legislature.*

## Statute of Repose

The WSA's top legislative priority is the adoption of a new and improved statute of repose for the design and construction industry in Wisconsin. As a result of a Wisconsin Supreme Court opinion in February 1989, Wisconsin is *one of only five states* that does not have a statute of repose that establishes a definite time period for bringing actions against architects and others involved in the design and construction of improvements to real property. Prior to the 1989 Supreme Court ruling, Wisconsin statutes required that actions be brought within six years of substantial completion of a building project. The WSA, along with a coalition of other design and construction industry groups, supports legislation that establishes a ten-year statute of repose period and clarifies that projects completed prior to its enactment are covered by the new law. Numerous studies have documented that the vast majority of design and construction-related claims arise prior to or immediately after the completion of construction. A 1987 study found that in all cases where claims were filed eleven or more years after the date of substantial completion, no indemnity payments were awarded to the plaintiff. However, substantial legal fees for both the plaintiff and the defendant can often be the result of these stale claims.

## Liability-Law Reform

The WSA supports legislative proposals to restore balance and fairness to Wisconsin's civil justice system. The present concept of "joint and several liability" can impose a substantial and inequitable burden on individuals and firms with "deep pockets" regardless of their relative degree of fault in causing injury. For example, the joint and several liability provision in existing state law can require a defendant found to be only 5% negligent to pay 100% of the damages awarded. At the same time, architects face significant and substantial costs for professional liability insurance coverage. The WSA and other professional and business groups support legislation that would limit the liability of those found responsible for an injury to their proportionate share of responsibility.

## State Building Code

The WSA supports a statewide building code that provides a fair and equal standard for building design and the opportunity for active participation by architects and other professionals in its formulation. Architects seek consistency in the development, adoption, interpretation, enforcement and application of building codes, but at the same time recognize that codes must have flexibility to accommodate new materials, technologies and design solutions. The WSA supports the present administrative rule making process that encourages broad public and professional input in the development of buildings codes. The WSA is opposed to limited special interest legislative proposals that seek specific technical code provisions to be adopted as part of state statutes rather than administrative rules. The WSA supports and encourages the state to take the steps necessary to have state accessibility codes and regulations certified by the U.S. Attorney General as being in compliance with federal Americans with Disabilities Act (ADA) standards.

## Sales Tax on Professional Services

The WSA remains strongly opposed to legislative proposals that would expand Wisconsin's sales tax to architectural and other professional services. Periodically, proposals surface to expand the sales tax base in order to fund new state "property tax relief" initiatives or to help solve projected state budget deficits. Given the state's present budget situation and the interest in reducing property taxes, proposals to expand the sales tax to professional services are likely to be considered during the current legislative session. In addition to being counter-productive in terms of Wisconsin's economic development efforts and goals, a sales tax on professional services would create serious inequities and complex administrative and enforcement problems. One state, for example, several years ago imposed its sales tax on architectural services only to repeal the tax within days because the tax was found to be "utterly confusing and a nightmare to administer."

## Affordable Housing

The WSA is committed to working with government, industry, community-based organizations and others in the design and construction industry to develop creative solutions to the problems of homelessness and affordable housing. Architects have consistently supported national policies aimed at expanding housing opportunities for the ill-housed, homeless and those with low incomes. With the significant cutback in federal housing funds in recent years, it is critical that public-private initiatives be encouraged at the state and local levels to address the availability and affordability of adequate housing for persons of low and moderate income.

## Energy & the Environment

Architects in Wisconsin and across the country recognize the continuing need to address energy and environmental issues. Protecting the environment and encouraging economic growth are often considered mutually exclusive efforts. However, advancements in environmental technology and methods make it possible to reduce building energy costs and, at the same time, increase the durability and comfort of buildings through environmentally responsible design, planning and construction. Energy efficiency in building design not only conserves our finite resources, but also reduces the impact of energy consumption on the environment. These issues have critical environmental, economic and social consequences that deserve everyone's attention. The WSA supports the development of balanced and comprehensive programs that promote energy conservation and encourage the protection of our environment.

## School Facilities

The WSA supports legislative and administrative initiatives to improve the educational environment and safety of Wisconsin's school buildings. Increased attention has been focused on the safety and overall condition of Wisconsin's and the nation's aging school facilities. Many older schools have been well maintained and meet minimum life-safety standards. Many others, however, require immediate attention and/or replacement. The WSA supported the adoption of minimum life-safety codes for older school buildings. The WSA supports legislative proposals that would assist local districts in meeting these safety standards and in creating new environments that support the educational needs of kids today and in the future.

## Procurement of Architectural Services

The WSA supports the selection of architects for public building projects based on their qualifications and competence. Public buildings are a vital part of the fabric of every community and should meet the highest standards of design and construction. To achieve this goal, state and local government procurement policies should make quality design a key criterion in the selection of an architect. A qualifications-based selection process provides the most cost-efficient procurement possible for architectural services; and the resulting design is likely to be less expensive to build, operate and maintain. The WSA supports the present state administrative rules pertaining to the selection of architects for state building projects. The WSA has assisted hundred of local governments and school districts in Wisconsin establish a similar qualifications-based selection process for professional architectural services and is opposed to legislative initiatives that would prevent public owners from utilizing this type of proven procurement methodology.

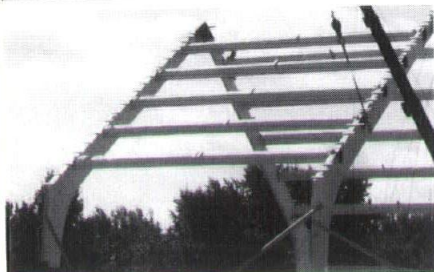

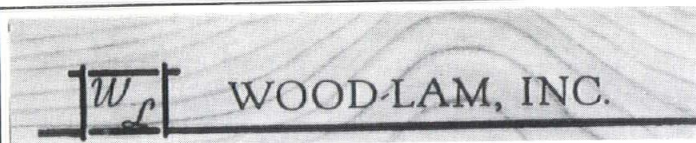

*The legislative recommendations and concern outlined in this summary reflect the major public policy issues that Wisconsin architects have addressed in the past and will continue to address in the future. Many of the recommendations are broad in scope and are of interest to many other organizations and Wisconsin citizens. For example, the proposed new statute of repose is supported by a broad-based coalition of design professional and construction industry organizations.*

*For additional information or background on these and other legislative issues being considered during the current legislative session, please contact the WSA office in Madison.*

**One Of  
America's  
Best Run  
Companies  
Gives 95%  
Of Its  
Money  
To Charity.**

CARE was recently named the best run, best managed charity in America.

We aren't surprised. 95% of every dollar we receive goes to help impoverished people. Only 5% goes to run our organization.

No other company could survive on margins like that. But a lot of starving people can.

# AIA Documents

The following is a list of the AIA Documents available from the Wisconsin Society of Architects. The WSA is Wisconsin's only authorized full-service distributor of AIA Documents. The first price listed indicates the *nonmember* price per document, and the second, the *WSA member* price. For more information or to order, please call (608) 257-8477 or 1-800-ARCHITECT.

## A Series/Owner-Contractor Documents

A101	Owner-Contractor Agreement Form—Stipulated Sum (4/87) with instruction sheet wrapped	1.50	1.10
A101/CMa	Owner-Contractor Agreement Form—Stipulated Sum—Construction Manager-Adviser Edition (1992) with instruction sheet wrapped	1.90	1.35
A107	Abbreviated Owner-Contractor Agreement Form for Construction Projects of Limited Scopes (4/87) with instruction sheet wrapped	1.50	1.10
A111	Owner-Contractor Agreement Form—Cost Plus Fee (4/87) with instruction sheet wrapped	1.50	1.10
A117	Abbreviated Owner-Contractor Agreement Form—Cost Plus Fee (4/87) with instruction sheet wrapped	1.50	1.10
A121/CMc	Owner-Construction Manager Agreement Where Construction Manager is Also the Constructor with instruction sheet wrapped (1991)	1.60	1.15
A171	Owner-Contractor Agreement for Furniture, Furnishings and Equipment with instruction sheet wrapped (1990)	1.80	1.25
A177	Abbreviated Owner-Contractor Agreement for Furniture, Furnishings and Equipment with instruction sheet wrapped (1990)	1.95	1.40
A191	Standard Form of Agreements Between Owner and Design/Builder (1985)	2.50	1.75
A201	General Conditions of the Contract for Construction (4/87)	2.90	2.00
A201/CMa	General Conditions of the Contract for Construction—Construction Manager-Adviser Edition (1992)	3.00	2.10
A201/SC	Federal Supplementary Conditions of the Contract for Construction (1990)	1.50	1.10
A271	General Conditions of the Contract for Furniture, Furnishings and Equipment with instruction sheet wrapped (1990)	2.25	1.60
A305	Contractor's Qualification Statement (12/86)	1.50	1.10
A310	Bid Bond (2/70)	.30	.20

A311	Performance Bond and Labor and Material Payment Bond (2/70)	.50	.35
A311WI	WI Private Improvement/Performance Bond (2/81)	1.00	.80
A312	Performance Bond and Payment Bond (12/84)	.60	.45
A312WI	Performance Bond & Payment Bond (WI Public)	1.00	.80
A401	Contractor-Subcontractor Agreement Form (5/87)	1.50	1.10
A491	Standard Form of Agreements Between Design/Builder and Contractor (1985)	2.50	1.75
A501	Recommended Guide for Bidding Procedures and Contract Awards (6/82)	2.75	1.95
A511	Guide for Supplementary Conditions (incorporates A512 6/87)	3.35	2.35
A511/CM	Guide for Supplementary Conditions—Construction Management Edition (3/82)	2.90	2.00
A512	Additions to Guides for Supplementary Conditions (12/89)	.20	.15
A521	Uniform Location Subject Matter (1981, Reprinted 7/83)	2.90	2.00
A571	Guide for Interiors Supplementary Conditions (1991)	3.00	2.25
A701	Instruction to Bidders (4/87) with instruction sheet wrapped	1.50	1.10
A771	Instruction to Interiors Bidders with instruction sheet wrapped (1990)	1.80	1.25

## B Series/Owner-Architect Documents

B141	Standard Form of Agreement Between Owner and Architect (4/87) with instruction sheet wrapped	1.40	1.10
B141/CMa	Standard Form of Agreement Between Owner and Architect—Construction Manager-Adviser Edition (1992) with instruction sheet wrapped	1.90	1.35
B151	Abbreviated Owner-Architect Agreement Form (4/87) with instruction sheet wrapped	1.25	.90
B161	Standard Form of Agreement Between Owner and Architect for Designated Services (11/77) with instruction sheet wrapped	1.10	.80
B161/CM	Standard Form of Agreement Between Owner and Architect for Designated Services—Construction Management Edition (12/82) with instruction sheet wrapped	1.25	.90
B162	Scope of Designated Services (11/77) with instruction sheet wrapped	3.85	2.70
B171	Standard Form of Agreement for Interior Design Services with instruction sheet wrapped (1990)	1.80	1.25

B177	Abbreviated Interior Design Services Agreement with instruction sheet wrapped (1990)	1.95	1.40	50 Sheets per unit:			
B181	Owner-Architect Agreement for Housing Services (6/78) with instruction sheet wrapped	1.10	.80	F501	Trial Balance-1953	4.75	3.35

## How To Build A Cozier Home

*R-Control® Building Panels  
keep you warm and give more comfort benefits, too!*  
Energy savings are really important. R-Control home owners report savings of 50% or more.

R-Control brings a lot more! Annoying hot and cold spots are eliminated, creating a more pollution-free home. Dust, pollens, noise, and other pollutants are held out by R-Control construction.

R-Control reduces fuel burning. A truly environmentally friendly home can be built.

R-Control is warranted for as long as you own your home.

Wisconsin EPS manufactures panels for the entire Midwest. Please call us to learn about: pricing, plans, literature, videos, and builder referrals.

R-Control is a trademark of AFM Corp.

# AIA Documents: Use and Reproduction

The AIA standard form documents are intended to be used as originals for the written contract between the parties. Changes are usually necessary to adapt the standard form documents to local customs and practices and to the special arrangements of an individual project. However, these changes are accomplished in distinctly different ways from those used with model forms.

In contrast to standard forms, model forms are intended to be used as reservoirs of suggested language which the drafting party may or may not choose to include in the final written contract. AIA Document A511, Guide for Supplementary Conditions, is a model form, one of three currently published by the AIA (the others are A571, Guide for Interiors Supplementary Conditions, and B511, Guide for Amendments to AIA Document B141). The key difference between model forms and standard forms is that modifications to the language of a model form become blurred and hidden within the integrated text of the author, whereas the modifications to a standard form are clearly differentiated from the language on the pre-printed form.

Two methods are recommended for modifying the standard form documents. One is through the attachment of supplementary conditions, special conditions or amendments. For example, AIA Document A201, General Conditions of the Contract for Construction, may be amended through the attachment of provisions drawn from AIA Document A511 or A512, Additions to Guides for Supplementary Conditions.

The other recommended method of modifying the standard form contracts is by writing, typing or striking out language directly on the pre-printed form. Care must be taken in making these kinds of changes. Handwritten changes should be initialed by both parties to the contract. Under *no*

circumstances should pre-printed language be struck out in such a way as to render it illegible (as, for example, with blocking tape, correction fluid or X's that completely obscure the text). This may raise suspicions of fraudulent concealment, or suggest that the completed and signed document has been tampered with.

It is definitely not recommended practice to retype the standard form documents. Besides being a violation of copyright, as discussed below, retyping can introduce typographical errors and cloud the legal interpretation given to a standard clause. (A detailed history of courts' interpretations of the provisions of the AIA documents may be found the *AIA Building Construction Legal Citator*.)

Retyping eliminates one of the principal advantages of standard form documents. By merely reviewing the modifications to be made to a standard form document, parties familiar with that document can quickly understand the essence of the proposed relationship. Commercial exchanges are greatly simplified and expedited, good-faith dealing is encouraged, and otherwise latent clauses are exposed for scrutiny. In this way, contracting parties can more confidently and fairly measure their risks.

## Copying Standard Form Documents

Most AIA documents are copyrighted under the name of the AIA national organization. The national AIA, as owner of the copyright, has the exclusive right to make copies, to authorize the making of copies by others, to prepare derivative works and to distribute copies, except as limited under the laws of the United States.

The AIA documents are intended to be used as "consumables"—that is, the original purchased by the user is intended to be consumed in the course of being used. Many of the documents contain blanks to be filled in. There is

no implied permission to reproduce these documents, nor does membership in the American Institute of Architects confer any further right to reproduce them.

Nevertheless, there are three types of licenses which the AIA may grant to individuals and organizations for the reproduction of its copyrighted documents:

- A license-to-purchaser for the reproduction of the entire pre-printed form in limited quantities and under limited circumstances;
- A license-to-purchaser for reproduction of excerpted materials under limited circumstances; and
- A formal written license obtained by written application to the AIA.

*License-to-Purchaser: Entire Document.* This license, authorized by resolution of the AIA Board of Directors in 1976, applies to most AIA documents with blanks to be filled in by the user; exceptions are AIA Documents A511, A511/CM, A571, A701 and A771. This license is automatically granted upon purchase of a document, but it does not take effect until the document is filled out with all information appropriate to a *specific project*, excluding signatures. The user may then make up to ten copies of the completed document for the specific project.

This license is granted based on the recognition that the purchaser may need further copies of the executed contract. Additional copies are usually needed for administrative purposes, and copies may even be needed for distribution to other parties to the contract on a specific project. This license does not permit the user to reproduce the AIA documents without their blanks filled in, or by retyping or rewriting.

This written notice of license-to-purchaser is usually found in the Instruction Sheet or inside the cover of

the AIA Document. The AIA documents that fall into this licensing category are as follows: all documents in AIA Documents series A, B, C and G except for A201, A201/SC, A201/CM, A271, A511, A511/CM, A571, A771 and B352. Of the remaining series (D, E and F), only D200 falls into this category.

*License-to-Purchaser: Excerpted Document.* This license, also authorized by the AIA Board of Directors in 1976, is granted to purchasers of AIA Documents A511, A511/CM and A571. These documents are model form documents, and contain recommended language for use in modifying AIA Documents A201, A201/CM and A271, respectively, along with explanations of that language.

It is intended that users of these documents retype selected language from them and include it in their project manuals as supplementary conditions. The license applies only to the recommended language and not to the explanatory language. There is no limit to the number of copies that may be made, since the number of project manuals cannot be known. Here again, however, reproduction must be for a *specific project* and not for general office use or information.

Neither of the two types of license-to-purchaser described above applies to AIA General Conditions documents (A201, A201/CM, A201/SC and A271) or AIA Instructions to Bidders documents. With the exception of the Federal Supplementary Conditions of A201/SC, which are not copyrighted, only originals of these documents may be used unless specific written permission has been granted by the AIA national organization.

*Written License.* Under certain circumstances, a written license to reproduce may be granted by the AIA. The normal procedure is for a party to write the AIA Documents Program requesting permission to reproduce an

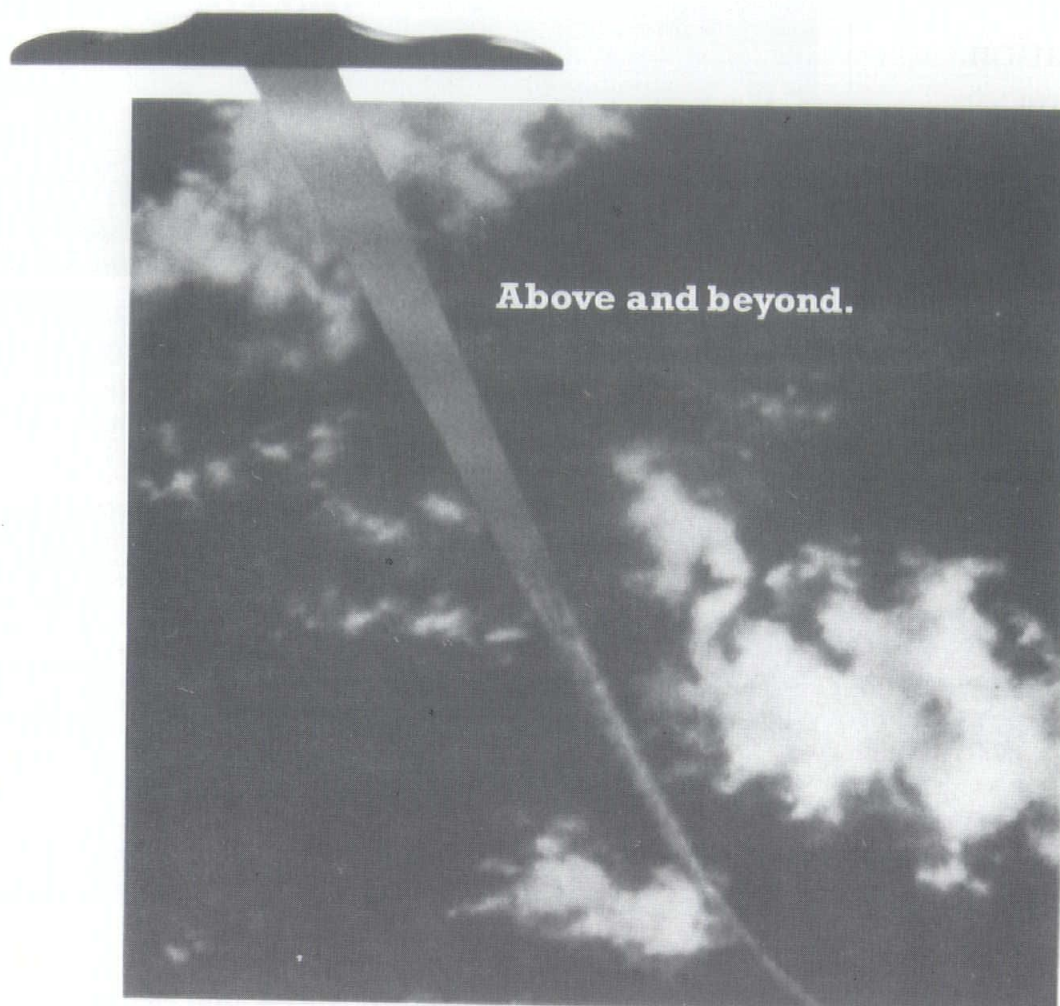

AIA document. A standard application form has been prepared and is ordinarily used for the written application. Upon receipt of the completed application form, AIA staff will review the request. Staff may or may not grant the request, having weighed 1) the difficulty the party would have utilizing the AIA documents in their customary and intended fashion as pre-printed forms, as against 2) the possible effect the licensed reproduction will have on the goal of the AIA Documents Program—standardization of construction contract documentation—and on the good name and reputation of the AIA.

This process may take over a few weeks to complete, and may be costly due to the additional fees and royalties charged to the applicant. Currently, a non-refundable application fee of \$40.00 is charged to all applicants. In addition, there may be charges for providing sample-labeled documents, and the possibility of royalties (equal to the retail cost per copy of the document) being charged for each copy made.

The purpose of protecting the language of the AIA documents is twofold: to protect the AIA's interest in its work product, and to protect the user from the consequences of unauthorized reproduction. As stated earlier, such consequences may be fairly minor ones arising from errors in transcription, or they may be major ones arising from intent to deceive. Either way, it is in the interest of the party offering the document as the basis for an agreement, and of the party considering that offer, to use the pre-printed standard form AIA documents. Both parties are thus assured that the terms are accurately presented and fair, and are spared the expense of exhaustively researching the document.

*EDITOR: The author is the Senior Director of Documents at The American Institute of Architects.*

**Above and beyond.**

For centuries, we have created, molded and shaped the structures of our villages and cities.

Join with your fellow visionaries to discover the possibilities for tomorrow unfolding at  
the 62nd Annual Convention of the Wisconsin Society of Architects.

Come and experience "Above and Beyond".

Design. Technology. Education. Comaraderie. Recognition.

## 1993 WSA CONVENTION WISCONSIN SOCIETY OF ARCHITECTS

May 25th & 26th, 1993 • Holiday Inn Madison West • Middleton, Wisconsin

*Call 1-800-ARCHITECT to register today.*

Design by Phoenix Marketing Group, Inc.

Offering complete services in the design, fabrication, finishing & installation of architectural metals, including hand forged ironwork.

## BLOCK TALK

### DECORATIVE BLOCK

The fact is decorative concrete block is one of the most economical and versatile building materials around. Why? Because it's strong, durable and low maintenance. And our decorative block comes in a variety of rich textures and colors for both interior and exterior treatments. One last fact to consider: all concrete block is not created equal. That's why it's important to choose block from Waukesha Block Company. Not only is our block strong, it's lighter... with exceptionally true dimensions.

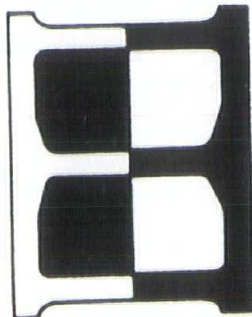

Decorative block from Waukesha Block Company. Concrete evidence that's stacked in your favor.

**"When we're ready to start construction, we know our Waukesha Block will be there... right on schedule. They keep their promises."**

Bill Dentinger - Mason Contractor

**"Decorative block from Waukesha Block comes in a variety of colors and textures. We're excited about the design options and quality it offers us and our customers."**

Bill Baesemann - Kings Way Homes

## Statute of Repose

In 1961, Wisconsin became the first state to enact a statute of repose to limit the "long tail" of liability for those involved in the design and construction industry. Wisconsin is now *one of only five states* without a statute of repose that protects architects from being sued after a finite number of years following substantial completion of a building project.

In February 1989, the Wisconsin Supreme Court struck down the state's existing statute of repose for the design and construction industry. The WSA anticipated such an unfavorable opinion and has been working with a consortium of design and construction industry organizations during recent legislative sessions to restore this law. Unfortunately, while our proposal was approved by the State Senate in 1992 as part of the state budget adjustment bill, it did not pass in the Assembly.

As architects, we design buildings that will be used for a long period of time. However, we only affect the buildings while under contract with the owners to provide professional services. Many architects carry errors and omissions insurance to protect themselves from claims made for injuries, real or perceived, that may arise as a result of their involvement on a particular project. But, should an architect remain liable for claims that can be made during the entire life of a structure?

An important factor affecting the liability exposure of architects and others in the construction industry are state laws that establish specific time periods during which actions may be brought against those involved in the design and construction of improvements to real property. A "statute of limitations" and a "statute of repose" are laws that require someone who believes they have been injured to bring action against the allegedly responsible party within a certain time period.

A new statute of repose proposal for the design and construction industry

has been drafted for introduction early in the current session of the Wisconsin Legislature. It is identical to 1991 Senate Bill 408. Representatives of Wisconsin's design and construction industry organizations have been working to gain support for this important legislation. All these groups agree that getting a new statute of repose on the books is the number one legislative priority for the current session.

Your grassroots contact with your own State Senator and State Representative is critical to the success of our proposal. Call and write your legislators and make them aware that passing a new statute of repose for the design and construction industry is critically important to the architects, engineers, contractors and others involved in the construction industry in your district. If they appear supportive, get this information to the WSA office. Working together, we can make a new statute of repose a reality this session. If you have any questions on who to contact, call the WSA office.

### Background

Statutes of limitations and statutes of repose are the oldest and probably the most fundamental statutory remedies for architects' liability problems. The two terms are often used interchangeably, but differ in terms of the exact point in time when the limitations "clock" begins to "tick."

Typically, a statute of limitations begins to tick at the time of actual injury or when a cause of action is discovered or should have been discovered. For civil actions, statutes of limitations are usually fairly short-term, in the range of three to six years. However, in reference to the design and construction of a building, an injury or discovery of a cause of action can occur at any time, effectively leaving the architect liable for damages for the entire life of a structure.

A statute of repose, on the other hand, sets a specific time, such as the date of

substantial completion of a building project, to start the statutory clock ticking. When the statute of repose clock runs out of time, all legal action for deficiencies in design or personal injury are barred. These types of state laws allow architects, and their heirs and insurance companies, to determine the point in time when their liability for a particular project will actually come to an end.

Forty-five states and the District of Columbia have statutes of repose, or laws interpreted as such, currently in effect. The repose period ranges from four to fifteen years, with the most frequent statute of repose period being ten years from the date of substantial completion. Wisconsin, Alabama, Alaska, Kentucky and New York are the only states without such statutory protection for the design and construction industry.

### Rationale

For decades, courts have recognized the prerogative of legislative bodies to establish time periods (statutes of limitations or repose) within which lawsuits can be commenced. The rationale for all such state statutes is the balancing of the interests of potential plaintiffs in bringing suits for their injuries with the interests of potential defendants in certainty and finality in the administration of their affairs, i.e. to be free from suit after a reasonable period of time.

The need to balance these competing interests is particularly compelling in the context of a construction project. The useful life of an improvement to real property can extend for decades, leaving the architect and the architect's estate with virtually unlimited liability. Architects, as professionals registered by the state, are not allowed to shield themselves behind a "corporate veil." This means that we place our personal assets and those of our heirs on the line whenever we provide services; and that exposure can last the life of a building.

The necessary extended record keeping involving all contract documents, shop drawings, change orders and other documentation establishing the liability among many players (owner, architect, engineer, general contractor, subcontractors, material suppliers, etc.) is an excessive and perhaps impossible burden. Further, after the owner's acceptance of the project, all maintenance and subsequent improvements are beyond the control of all the other parties to the initial construction. Architects can not prevent building owners from making alterations that, years later, may be determined to be unsafe or defective and appear to be part of the original improvements.

Statutes that limit the liability exposure of architects are in the best interest of both the profession and the public at large. With no time limit on an architect's liability, insurance companies, if they can offer coverage at all, must charge higher premiums. In addition, the public suffers from clogged courts and from architecture which reflects that caution necessitated by unlimited liability.

Statistically, numerous studies have demonstrated that these statutes do unfairly limit the interests of plaintiffs. For example, a 1987 study found that all claimants who received indemnity payments were injured within eleven years of the completion of construction and 95% within nine years. Claims after ten years of substantial completion typically result in no payment to the plaintiff, but substantial legal fees for both the plaintiff and the defendant.

To paraphrase one state supreme court opinion, there comes a time when architects ought to be reasonably secure that the slate has been wiped clean of ancient obligations. We should not have to be called on to resist a claim when, with the passage of time, evidence has been lost, memories have faded and witnesses have disappeared.

## Wisconsin

Over the past several decades, the Wisconsin Legislature has enacted two statutes of repose for the design and construction industry. In fact, Wisconsin was the first state to adopt such a statute in 1961.

In 1975, the then existing statute was declared unconstitutional by the Wisconsin Supreme Court. In response to this decision, the Wisconsin design and construction industry lobbied in support of a new statute that was passed and signed into law in 1976. The new law required that actions for injuries arising from the design and construction process must be brought within six years of substantial completion.

However, the Wisconsin Supreme Court subsequently ruled that this statute only applied to projects completed after 1976. In other words, any project completed prior to its adoption did not benefit from the requirement that actions be brought within six years of the date of substantial completion. These pre-1976 projects only had the benefit of statutes that require lawsuits to be brought within three years after the time of personal injury or within six years of discovery if only property damage is involved.

In its February 1989 opinion in *Funk v. Wollin Silo & Equipment, Inc.*, the Wisconsin Supreme Court ruled that the entire statute, section 893.89, *Wisconsin Statutes*, was unconstitutional. According to the Court, the legislation adopted in 1976 failed to correct all the constitutional deficiencies identified by the Court when it struck down the previous law.

As a result, there currently is no statute of repose for the Wisconsin design and construction industry. In its most recent opinion, however, the Court indicated that legislation could be drafted that would meet the constitutional issues involved.

## Action

As in past sessions of the Wisconsin Legislature, the WSA is working with a coalition of design and construction industry organizations for the adoption of a new and improved statute of repose. Key provisions of this legislation would:

- Establish a statute of repose period of ten years from the date of substantial completion of a construction project. Legal actions against architects and others involved in improvements to real property would be barred after a project has been completed for ten years.
- Within this ten-year statute of repose period, establish a three-year statute of limitations requiring that legal action be brought within three years after a person discovers or should have discovered an act or omission.
- Include appropriate language and classifications (e.g. owners and occupiers) to enable the new statute to withstand future constitutional challenges.
- Clarify that the legislation applies to projects completed prior to the date of enactment of the new statute so that they, too, benefit from a ten-year statute of repose period and three-year discovery rule.

Your support for this statute of repose legislation is important. Stay in contact with your state legislators and encourage them to support this remedial legislation.

Please contact the WSA office for further details about the statute of repose proposal...1-800-ARCHITECT or (608) 257-8477.

*EDITOR: The author is Chair of the WSA Legislative Committee and has testified in support of similar legislation introduced in previous sessions.*

## THE PROBLEM:

*Making a floor stiff, sturdy  
and squeak-free*

## THE SOLUTION:

*G-P Wood I Beam™*

It's a problem builders and architects face all too often: floors that are not as stiff or quiet as they should be. The solution is Georgia-Pacific Wood I Beam™.

- Greater load-bearing capacity than conventional lumber and most other I-joists.
- Unsupported spans up to 24' are possible.
- Wider flange creates more gluing and nailing surface.
- Won't twist, shrink or bow, and resists warping.

The end result: a stiff, sturdy floor that is built to be seen but not heard.

## Historical Restoration Capabilities

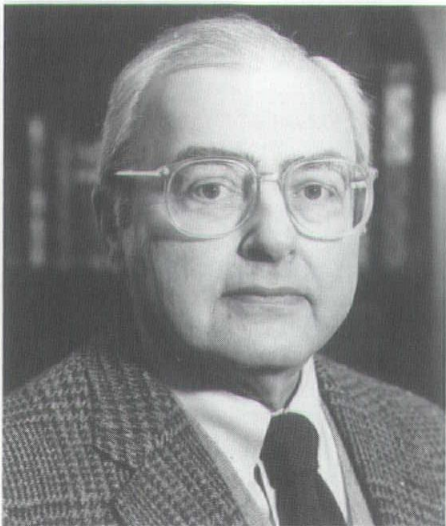

### WSA Golden Award

The seventh WSA Golden Award has been awarded to Harry A. Schroeder, AIA, La Crosse. In accordance with previously adopted rules and procedures, Harry was named the recipient of the 1993 Golden Award by the WSA Board of Directors at its December meeting in Milwaukee.

The Golden Award is the highest honor the WSA can bestow on one of its members. Its purpose is to recognize individual architects who have performed most distinguished leadership and service to the WSA over an extended period of time and have advanced the cause of the profession in providing inspiration to their fellow practitioners.

The WSA Golden Award will be formally presented as part of a special 1993 WSA Convention luncheon program on May 25 at the Holiday Inn Madison West. In recognition of his contributions to the WSA and the profession of architecture, Harry joins an elite group of previous WSA Golden Award recipients that includes: David E. Lawson, FAIA; Paul H. Graven, FAIA; Mark A. Pfaller, FAIA; Wayne E. Spangler, FAIA; Leonard H. Reinke, FAIA; and Nathaniel W. Sample, FAIA.

Harry A. Schroeder, AIA

### 1993 WSA Convention

The future is fast approaching...and your practice will be vastly different from today. Economic, social, technological and political changes will create many challenges and opportunities.

The 1993 WSA Convention, *ABOVE AND BEYOND*, will bring you face-to-face with the future of architecture on May 25 & 26 at the Holiday Inn Madison West. Keynote speakers and seminar leaders will address the emerging trends in design, practice and technology. You will learn how to effectively position yourself and your firm for the marketplace of the future...and discover what it will take to go *ABOVE AND BEYOND* traditional services to meet the expectations of your clients in the 90s and beyond.

The opening keynote address by Mike Fitzgerald, a visionary strategic planner, will set the stage by focusing on the profession's leadership role in renewing America in today's global economy. To help you prepare for the future, he also will conduct a seminar on creating a client-focused culture within your firm.

Michael Brill, a leading consultant on the design of high performance workplaces and therapeutic environments, is the featured keynoter on day two and also will lead a seminar discussion on office design of the future.

A wide array of other professional development seminars, educational opportunities, awards programs and special events will take you *ABOVE AND BEYOND* where WSA Conventions have gone before. These programs will include seminar sessions with Oliver Witte on integrating computer technology in your practice, a SMPS-sponsored seminar on Total Quality Management, a special tour of the new UW-Madison School of

Business, and the annual WSA Construction Industry Reception in the Trade Center and much more!

Mark your calendar and plan now to participate in the 1993 WSA Convention on May 25 & 26 at the Holiday Inn Madison West. For additional information on *ABOVE AND BEYOND*, contact the WSA office at (608) 257-8477/1-800-ARCHITECT.

### Building Connections

You can't see, hear or probably even smell it, but it can make your life miserable and even cause you to quit your job or move out of your neighborhood.

In recent years, health, science and building professionals have discovered that many of today's buildings contain materials that emit toxins and ventilation systems that restrict the flow of fresh, uncontaminated air. This condition, known as "sick building syndrome," can cause inhabitants to have headaches, nausea, fatigue, respiratory problems and other serious illnesses. For employers, it can cause other headaches, including a decrease in worker productivity and potential lawsuits.

A video teleconference, scheduled for telecast on March 4 at the Wisconsin Union South in Madison, will examine this issue and teach architects, other design and construction professionals and business leaders how to correct these problems in existing buildings and avoid such dangers when designing new facilities.

The teleconference is the second session of "Building Connections: Linking Economy and Ecology for a New Prosperity," a series of three four-hour programs sponsored by The American Institute of Architects. In

Wisconsin, the teleconference series is being sponsored by the Wisconsin Society of Architects and the Wisconsin Center for Demand-Side Research, a nonprofit organization created to promote energy conservation.

The program will provide participants with scientific and hands-on information that will include case studies of outstanding projects, panel discussions and opportunities for participants at local sites to ask questions via telephone or fax of expert architects, engineers, energy consultants, developers, designers, planners and other building professionals. In addition, each participant will receive a workbook designed to reinforce and expand upon the information presented during the video teleconference.

On April 22, the final teleconference session will examine the complex issues of land use, resources and the urban ecology. Participants will learn new methods to integrate waste management, transportation, land use and infrastructure to maximize the quality of living while reducing the toll communities take on the environment.

Anyone wishing to receive more information about one or all of the video teleconferences may call 800-365-ARCH (2724). Individuals interested in registering should call 800-677-2111. Registration also will be accepted by fax 800-677-3555, and the TDD number is 800-677-3020.

### **Legislative Action**

The Wisconsin Legislature is back in session; and there are many new State Representatives and State Senators beginning their first term. One thing for certain is there will be no shortage of legislative issues and proposals having a direct impact on the business and practice of architecture. This also means that there will be many opportunities for WSA members to get

actively involved in the legislative process during the two-year session.

The WSA Legislative Committee meets regularly in Madison to monitor and to develop strategies for influencing proposed state legislation and administrative rules that affect the profession and your practice. Liaison committees also have been established with the Division of Safety and Buildings at DILHR and the Division of Facilities Development in the Department of Administration.

Of critical importance if the WSA is to achieve its legislative goals this session is the active participation by all 1,100 WSA members in the legislative process. You are encouraged to contact the WSA office if you are aware of any proposed or existing legislation that should be addressed by the WSA. The Legislative Committee also encourages you to "adopt" a state legislator or two and make them aware of the issues of importance to Wisconsin's design and construction industry.

A recent computer analysis of the WSA membership discovered that we have at least one member architect in each of the 33 State Senate districts and in all but a dozen of the 99 State Representative districts. Utilizing this broad grassroots network of direct member/constituent contacts can assist the profession in achieving its legislative priorities, such as the enactment of a new statute of repose. Get to know your own State Senator and Representative by communicating with them regularly and by inviting them to visit your office or to participate in the groundbreaking ceremonies of projects in their district. This ongoing contact will help make them more receptive when you ask for their support on a particular issue.

In addition, there are several other opportunities for you to participate in the political/legislative process that

will shape the future of your profession...the Wisconsin Society of Architects/Political Action Committee (WSA/PAC) and the WSA Conduit Fund.

The WSA/PAC was established in 1978 to encourage the election of candidates for state office who are sensitive to architecture and legislative matters affecting the design and construction industry. It is an independent, voluntary and bipartisan group of individual architects with a sincere interest in improving government through active involvement in the political process. As a result of personal contributions from WSA members like you, the WSA/PAC was able to contribute a total of \$2,600 to over 20 legislative candidates last fall. While direct individual contributions are also important, a contribution from the WSA/PAC is recognized by these candidates as support from the entire architectural profession and helps make architects "players" in the political process.

In October, the WSA Board of Directors authorized the establishment of a WSA Conduit Fund. Conduits are growing in popularity; and this adds another arrow to the WSA's political action quiver. Conduits are similar to PACs in that the individual contributions can be bundled up for distribution to specific candidates, but contributors to a conduit get to direct their campaign contributions and candidates receiving conduit funds get to count them as contributions from individuals. So, it really is the best of all worlds...the WSA and profession are seen as "players" in the process, contributors maintain control over their WSA Conduit Fund account and candidates get to count conduit contributions as coming from individuals.

If you are interested in participating in the political process in this way, please

make your personal check payable to the "WSA Conduit Fund" and mail it to the WSA office. A minimum WSA Conduit Fund contribution of \$50 is requested. For more information, contact the WSA office.

## Fellowship

With the exception of the AIA Gold Medal, advancement to Fellowship is the highest honor The American Institute of Architects bestows upon one of its members. Elevation to Fellowship not only recognizes the achievements of the architect as an individual, but also elevates before the public and the profession a model architect who has made a significant contribution to architecture and society.

Fellowship is granted to architects who have shown distinction in fulfilling the objectives of the Institute. These five "objects" or categories for advancement include the following:

- *To promote the aesthetic, scientific and practical efficiency of the profession.* Fellowship in this category is granted to architects who have produced distinguished bodies of work through *design, urban design, preservation or practice* of architecture. This may be accomplished through individual or organizational effort. Works submitted may be of any size, for any client, of any scope and reflecting any type of architectural service, including project management and firm operations.
- *To advance the science and art of planning and building by advancing the standards of architectural education, training and practice.* Fellowship in this category is granted to architects who have made notable contributions through their work in *education, research or literature*. Work in education may be teaching, research (including inventions), administration or writing, and should have a lasting impact, be widely

recognized and provide inspiration to others in the field and the profession.

- *To coordinate the building industry and the profession of architecture.* Fellowship in this category is granted to architects who have actively, efficiently and cooperatively *led the construction industry, the Institute or related professional organizations* over a sustained period of time and have gained widespread recognition for the results of their work.

- *To insure the advancement of the living standards of people through their improved environment.* Fellowship in this category is granted to architects who have made notable contributions in *public service* or in *government or industry service* through leadership in the development of civic improvements and needed governmental projects, including such elements as conservation, beautification, land use regulation, transportation or the removal or blighted areas, or who have clearly raised the standards of professional performance in these areas by advancing the administration of professional affairs in their fields.

- *To make the profession of ever-increasing service to society.* Fellowship in this category is granted to architects who have made notable contributions to the public good beyond the scope of normal professional activities. Achievements may be of a kind that transcend the other categories for advancement—to serve society or humanity in a unique and important manner.

In 1992, the jury of the AIA College of Fellows elevated 123 members to Fellowship, out of 217 nominated nationwide. Overall, Fellows comprise about 4% of the AIA membership.

The WSA is fortunate to have 16 Fellows among its membership. These individuals comprise the WSA

Fellowship Committee. The Fellowship Committee meets each year to identify Fellowship candidates and to assist candidates develop their nomination portfolio. The following are the WSA members who are Fellows, with the year of their advancement indicated in parentheses:

Ronald Gene Bowen, FAIA, (1988)  
Joseph H. Flad, FAIA (1969)  
Paul H. Graven, FAIA (1978)  
John P. Jacoby, FAIA (1976)  
David T. Kahler, FAIA (1983)  
David E. Lawson, FAIA (1985)  
Maynard W. Meyer, FAIA (1972)  
Gordon D. Orr, Jr., FAIA (1979)  
Mark A. Pfaller, FAIA (1972)  
Leonard H. Reinke, FAIA (1979)  
Nathaniel W. Sample, FAIA (1974)  
George A.D. Schuett, FAIA (1977)  
Wayne E. Spangler, FAIA (1987)  
Allen J. Strang, FAIA (1967)  
Fritz Von Grossman, FAIA (1965)  
William P. Wenzler, FAIA (1971)

Any AIA member in good standing for ten years or more is eligible for advancement. Fellowship candidates can be nominated by the WSA Board of Directors based on the recommendations of the Fellowship Committee, by five or more Fellows or by ten or more AIA members. For further information, advice or assistance, please contact the co-chairs of the WSA Fellowship Committee: Ron Bowen, FAIA, at (608) 238-7626 or Wayne Spangler, FAIA, at (715) 234-9056.

## Long-Range Plan

The WSA Board of Directors annually reviews and discusses in detail major WSA program areas in relation to five-year budget projections. The following briefly summarizes the goals and priorities identified in the 1992 WSA Long-Range Plan Report:

- Continue the development of programs to increase public awareness and appreciation of the value of architecture and architects. Public

Awareness Committee to prepare a recommended implementation plan based on targeted studies and research and on ongoing feedback and involvement of members.

- Support efforts to increase member participation in Chapter programs and assist in the coordination of Architecture Awareness Week activities to promote public participation and media attention.
- Establish a Task Force to develop recommendations for improving the effectiveness of the WSA Board of Directors.
- Strengthen WSA government affairs activities by identifying each member's State Senator and Representative, encouraging grassroots membership involvement in legislative campaigns, increasing awareness of and contributions to the WSA Political Action Committee and targeting a limited number of key campaigns for extensive member participation and financial support.
- Support and coordinate efforts to provide information and educational programs on the Intern Development Program (IDP) to assist interns in becoming licensed.
- Keep members informed about future continuing education requirements and develop, in cooperation with School of Architecture where appropriate, accessible and inexpensive programs to assist members in complying with established standards.
- Encourage members to present programs on architecture in school classrooms during Architecture Awareness Week and compile reports on these presentations as a resource manual for future use by members and the WSA Environmental Education Committee.
- Continue to explore alternative non-dues sources of revenue to maintain a balance between projected WSA budget income and expenses.

Your input and feedback are important. If there are issues that you believe should be addressed by the WSA Board of Directors as part of its annual long-range planning process, contact a WSA Board member, discuss them at a local Chapter meeting or call the WSA office.

### **IDP & Licensure**

The WSA office has received a number of questions from interns and firms about the new IDP and other requirements for becoming licensed as an architect in Wisconsin. The following answers some of the most frequently asked questions and is reprinted from the August 1992 *Wisconsin IDP Newsletter*.

*What do I need to get an architecture license?* Remember the three E's: Education, Experience and Examination.

*How much education and experience do I need?* In Wisconsin, the magic number is seven years of education and experience. For example, a Professional Degree is worth five years (Bachelor of Architecture or Bachelor of Science plus a Master of Architecture). A candidate would only need an additional two years of experience.

*But I don't have a Professional Degree. What else do I need to do?* The magic number is still seven. With no professional education, you need seven years of experience; a person with a two-year Associate Degree from a technical school would need five years of experience. The candidate with a pre-professional type degree still needs three years.

*What kind of experience do I need?* You need to have a minimum of two years of very specific work and professional experience with a minimum number of hours in the

fourteen areas of experience categories, from Programming to Construction Observation, outlined in the *IDP Guidebook* and *Wisconsin Rules*.

*And what are the fourteen areas?*

Programming, Site & Environmental Analysis, Schematic Design, Building Cost Analysis, Code Research, Design Development, Construction Documents, Specifications & Materials Research, Document Checking & Coordination, Building & Contract Negotiation, Construction Phase—Office, Construction Phase—Observation, Project Management, Office Management, Professional & Community Service, Energy Conservation.

*How do I verify or prove my experience to the Examination Board?* By participating in IDP or the Wisconsin Equivalent documentation method.

*Why is the IDP a better way to go?*

Because IDP is a universally accepted method of gaining the required experience in the United States of America and Canada. Most states are requiring both a Professional Degree and completion of IDP for architectural registration. NCARB will require an IDP record to obtain NCARB certification after 1996.

*What is NCARB?* NCARB is an acronym for National Council of Architectural Registration Boards. There are 55 members, including Examining Boards of the fifty states, Washington DC and territories. NCARB is the vehicle through which the 55 State Boards cooperatively write the Architectural Exam, aid in reciprocity and work to help state laws become uniform in regard to reciprocity.

*How is NCARB different from AIA?* As the name implies, NCARB is a council of state examination and registration boards. There are only 55 member boards. The AIA is a professional organization of individual architects.

*When can I take the exam in Wisconsin?* As of January 1, 1993, you must have completed all but one year of your education and experience, (six years of the combination) and present such documentation 60 days prior to the examination date.

*I heard about the four-year rule, what is that?* That rule required candidates to pass all of the exam within a four year period or start over. It is in the process of being repealed.

*How is the Wisconsin Equivalent different from IDP standards?* There's no cost to the candidate. Neither is there any support; you're on your own. You are responsible for fulfilling the requirements. You still need a sponsor and advisor who will be able to verify your experience.

*What do you mean by sponsor?* A sponsor is most often your employer or supervisor who has primary responsibility for training and providing on-the-job experience.

*What is an advisor?* This person should be outside of your firm, a friend and sounding board, who helps by giving unbiased advice.

*Will the Wisconsin Equivalent transfer to other states?* Some, yes; most, no. However, it can be applied to the IDP/NCARB.

*May we work part time through school?* Wisconsin will not give experience credit for work while you attend a university. The IDP program does give credit after the Junior year of architecture education, as part of the three year requirement.

*What does the future hold for the architectural candidate?* First, standards for becoming an architect are becoming uniformly higher across the country. A professional degree and

IDP are now required in over 35 states, with more states passing similar legislation.

As of January 1, 1993, Wisconsin required all new examination candidates to show evidence they have all but one year of the required education and experience when they apply to sit for the Architect Registration Examination. Please note the application is due 60 days prior to the examination in mid-June.

Also, as of January 1, 1993, any candidates who have not completed all necessary documentation, references, as well as all parts of the Architect Registration Examination, must document their experience using the IDP or equivalent method. This will include all candidates who passed the December 1992 ARE, and all candidates who have not finished the necessary paperwork, or did not have enough experience, even though they may have passed the June 1992 ARE.

The Wisconsin Board is also in the process of changing the state statutes to require a professional degree, or up to 13 years of experience without a degree, in order to be an architect.

The paper and pencil examination now being given will be replaced in 1997 by a completely computerized, administered and graded examination. This will include the design and site exam. Look for the design exam to be divided into smaller parts starting next year, as a preparation for the computer exam.

If you are an intern who has questions regarding IDP or if you are an architect who would like to be a sponsor or advisor, please contact your local Chapter IDP Coordinator: Northwest Chapter: E. Mitchell Spencer, AIA, (715) 232-1176; Northeast Chapter: Kevin Shumann, AIA, (414) 725-

6346; Southwest Chapter: Arlan Kay, AIA, (608) 251-7515 and Rich Wandschneider, AIA, (608) 238-0211; or Southeast Chapter: George Owen, AIA, (414) 359-2300.

## Oops

Gordon Janowiak and Photo Concepts, Inc., deserve all the credit for the photography featured on the cover and in the Milwaukee Federal Building restoration article in the November/December issue of *Wisconsin Architect*. We regret the error.

Also, Robert Burley, FAIA, the executive director of the Taliesin Preservation Commission, wrote to thank *Wisconsin Architect* for the article on the TPC and to clarify that credit should be given to Taliesin Architects for their drawings of the Romeo and Juliet windmill and to the Foundation as well as Taliesin Architects for the important roles they both played in accomplishing the reconstruction project.

## WSA Documents Committee

The WSA's AIA Document Coordinators thank all the members who responded to its questionnaire on your use of and opinions on the Standard AIA Agreement forms as they apply to residential or light commercial projects.

In general, two types of replies were received. Many members indicated that they use these documents and feel they work just fine. Other members felt that either their clients or the contractors found them too complicated and legalistic and somewhat "frightening."

The AIA is working on producing a family of fully-integrated documents for light construction. The documents are in the drafting stage; and the work

has proceeded using the following assumptions and restraints, some of which may change during the drafting process:

- A separate General Conditions document for small projects that relates to the Owner/Contractor Agreement and Owner/Architect Agreement.
- Divide architectural services into only two phases—design and construction.
- There will not be an extensive list of additional services, except those identified in other provisions in the Owner/Architect Agreement.
- Small project documents will assume, for simplicity, the involvement of a single contractor.
- No arbitration provisions, but mediation may be included.
- Simplified construction documents (e.g. no separate specifications).
- Cost estimating services to be provided by the contractor.
- Architect's compensation based on an hourly rate or lump sum rate rather than a percentage of construction costs.
- Contractor's proposal (bid) to include a schedule of work itemizing the costs of the various construction tasks.
- Documents written in plain English.
- Interested parties, such as contractors, owners, etc., will review and comment on the documents.
- Consideration will be given to developing small project documents as model forms, rather than as standard forms.

If you have any questions, comments or recommendations on AIA documents, you are encouraged to contact one of the following state document coordinators: Brian Larson, AIA, (715) 834-3161; Steven Groth, AIA (414) 962-6100; or Warren Smith, AIA, (414) 299-1946. Your feedback and response will enable the WSA and the AIA to be responsive to your document needs.

## People & Places

**Randall A. Page, AIA**, has announced a business partnership with Rachel Deprey to form Deprey Page and Company. The architectural and interiors firm is located at 2301 Atwood Avenue, Madison 53704; (608) 241-4707.

**Bill Montelbano, AIA**, has established his own firm Bill Montelbano, Architect AIA, 8 East Hudson, PO Box 123, Mazomanie 53560-0123; (608) 795-4540.

**William Williams, AIA**, with Engberg Anderson, Inc., Milwaukee, has been named by the *Business Journal* as one of its "40 under 40," Milwaukee's next generation of business and community leaders.

Eppstein Keller Uhen, Inc., Milwaukee, has announced that **Greg Uhen, AIA**, will manage the firm's business efforts.

An informational brochure for private companies interested in providing employer-sponsored child care is available from **Todd Hutchinson, AIA**, with Guenther-Wagner-Johnson at (414) 476-2150.

CPR Associates, Inc., De Pere, was awarded Best of Show and Award of Excellence honors as part of the 1992 Fox River Valley Excellence in Masonry Awards program for Austin E. Cofrin Hall on the St. Norbert College campus in De Pere.

Governor Thompson has announced the winners of the 1992 State Building Program design and construction awards program coordinated by the state's Division of Facilities Management. Balestrieri-Kehoe, Inc., Elkhorn, was presented the Excellence in Architectural Design/Addition-Remodeling Award for its design of

the Athletic Facility Addition for the Wisconsin School for the Deaf. Short Elliott Hendrickson, Inc., Chippewa Falls, was selected for the Excellence in Architectural Design Award/New Construction for its design of the DNR Chippewa Moraine Ice Age Interpretive Center.

*Bowler's Journal* magazine has recognized Warner, Pfaller & Associates, Inc., Milwaukee, as the winner of its Best Renovated Interior award for the firm's work with Leisure Time Recreation Center in Manhattan.

Architectural Associates, Ltd., has announced its relocation to The Landmark Building, 5801 Washington Avenue, Racine 53406; (414) 886-1700.

The Stubenrauch Associates, Inc., has moved its Appleton office to 2277 West Spencer Street, Appleton 54914; (414) 739-4932.

WSA members **Charles Quagliana, AIA, Dan Stephans, AIA, David Kahler, FAIA, Cherie Claussen, AIA** and **Art Chadak, AIA**, attended the fall meeting of the national AIA Historic Resources Committee in Charlottesville, Virginia. The three-day meeting focused on historic rehabilitation, philosophy and technique. The group toured Montpelier, Ash Lawn-Highland, Monticello and the University of Virginia Academic Village plus had behind-the-scenes guided tours of the Octagon and the Capitol in the District of Columbia.

Azon Corporation, manufacturer of design and reproduction products, has developed a marketing program in conjunction with the AIA that can also generate non-dues revenue for AIA Chapters like the WSA. For each

postcard returned to Azon, the WSA will receive one dollar. In addition, the WSA is eligible for royalties when members purchase Azon products.

When negotiating contracts for school district projects, are you encountering proposals containing extensive modifications to the standard AIA Document B141? If you answered yes, the AIA documents staff would like to hear from you and receive samples of the proposed contract language. This information will help the AIA respond to the contract modifications being proposed by the National School Boards Association. Please address correspondence to the attention of Dale Ellickson, FAIA, at the Institute; (202) 626-7359.

The UW-Madison Department of Engineering Professional Development is offering a three-day workshop on *Creativity in Design* on March 17-19. The registration fee is \$925. For information call 800-462-0876.

The AIA is developing a set of special programs for Sole Practitioners at the national 1993 AIA Convention on June 18-22 in Chicago. To receive advance announcements of these programs, you just have to provide your name and address to: Aster Tessema, The American Institute of Architects, 1735 New York Ave. NW, Washington, DC 20006; fax (202) 626-7518.
